FACTORIES

Many industrial plants have harsh environmental conditions. In production areas; factors such as heat, dust, humidity, and water are among the main problems that luminaires have to deal with. Each industrial facility has its own production line and layout plan. This necessitates unique product solutions designed for every space. With our wide range of products customized to meet the needs of different industries, we offer a wide range of products to the chemical, iron, and steel industry, petrochemical facilities, food production facilities, automotive and sub-industry, workshops, etc. We offer the most accurate product solutions in industrial areas.

ᆄ 려 GAS STATIONS

Good lighting of fuel stations provides a safe and attractive environment for drivers during the journey. Important in providing High impact resistance, heat, dust and water resistant at gas stations, Luminaires that do not create glare should be preferred. Gas stations that require special lighting solutions Canopy fixtures are suitable for In addition, in the rest area and market section, downlight, linear and office While luminaires are preferred, projector and road/street luminaires should be preferred outdoors. wide product We offer the most ideal solutions for gas stations with our portfolio.

LOGISTICS

Logistics facilities are one of the departments of enterprises that work 24/7. Since there is continuous work, occupational safety, savings and lighting in accordance with the standards are of great importance. We offer the most accurate solutions for cold storage, shelf storage areas, packaging, and shipping areas with our product portfolio that is highly energy efficient, long-lasting, and maximizes visual comfort.

${\scriptscriptstyle \perp}$ ROAD AND STREET

The choice of the luminaire in road and street lighting is important for easy detection of dangerous places and our safety. The light intensity, which dazzles due to vehicular traffic on the highways, is balanced by the right lighting systems. Standards for areas with accident risk such as highways, pedestrian crossings, intersections While our suitable lighting fixtures provide ultra performance, they also offer energy savings. Our smart products, which are easy to maintain and follow, are environmentally friendly and long lasting.

STADILIMS

Good lighting conditions should be created in order to achieve a clear view in stadiums. Light is of great importance in terms of reflecting the matches taking place in the arena in the best way and transferring them to the audience. Match, training, show, etc. Professional projectors that can adapt to organizations with ultrahigh performance, long life, high impact resistance, different lens angles, and protection against external factors are preferred.

GYMS

In order for the activities in the sports halls to be healthy, the lighting design should be planned in the most accurate way. Suitable for HD shooting, anti-glare optical design, energy saving, and customized products for gyms will bring users together with a unique experience. Our products, designed for use only in gyms, with flicker-free, high-impact resistance, anti-glare optical design, offer a perfect lighting experience.

ENVIRONMENT AND FIELDS

In lighting squares, walking paths, bicycle paths, roads and streets, boulevards, open car parks, and ports, products that are both suitable for the architectural structure of the place to be used and resistant to external factors should be selected. We offer the most accurate product solutions for environmental and area lighting with our high-performance, environmentally friendly park and garden poles, bollards, wall-washers, projectors, road, and street luminaires, equipped against seasonal factors such as water and dust.

MALL. STORE AND CAR PARK

Shopping centers and stores are designed in a striking and eye-catching way. We offer a long-term shopping experience to your customers by creating relaxing and exciting environments with our glare-controlled special diffuser products. With our angle-adjustable special solutions, the shelves are illuminated in the most accurate way, allowing the products to be found easily and quickly. In the open-closed car parks in shopping malls, the parts where there is not much light narrow our view, and our safe driving experience decreases. We offer a safe and accurate lighting experience with our luminaires with advanced vision and sensor features for entry and exit routes in parking lots, emergency exit directions, parking areas and different ceiling sizes.

HISTORICAL AND CULTURAL BUILDINGS

It preserves the structure and texture that are important in historical and cultural areas. The unique architecture of the work is revealed by offering alternatives that do not harm the historical texture and culture, with luminaire options suitable for the architectural texture of the projects. Specially designed lighting fixtures, which are carefully prepared, help to preserve the cultural heritage for years, while offering a unique experience to their users.

HOSPITALS

Energy efficiency, visual comfort, and service life are the main factors to be considered in hospital lighting. Laboratories, operating rooms, patient care rooms, intensive care units, corridors, etc. We offer solutions to your luminaire needs, suitable for high-performance and sterile environments, for surfaces such as surface-mounted and underground.

A SCHOOLS

Visual comfort, energy saving, and service life are the most important factors to be considered in school lighting. Choosing the right lighting fixture for each of the corridors, classrooms, laboratories, libraries, canteens, conference rooms, parking lots, sports halls, fire escapes, and playgrounds is of great importance for the safety of educational areas. In our structure; We offer all your lighting needs in school projects with backlight panels, downlights, linear fixtures, emergency lighting and direction fixtures, and unique high ceiling fixtures designed for sports halls, projectors, and road, and street fixtures.

RESIDENTIAL

We offer a wide range of products for residential lighting. All for indoor and environmental lighting you can meet your needs from a single address. Indoors such as rooms, bathrooms, stairs and corridors; the most ideal solutions for lighting fixtures are downlights, linear products and sconces. Landscape areas, in outdoor areas such as walking and bicycle paths, wallwasher, bolard, park garden poles, floodlight, road and we meet all your needs from a single address with street luminaires.
