

With the DMX512 protocol, dynamic and customized lighting effects can be created by controlling each LED individually.

Buildings, bridges, sculptures, and many other structures are visually emphasized in a stunning way with **color changes and effects.**

Customizability and Longevity allow users to tailor systems to their needs and preferences and use them for extended periods.

Scenarios can be **easily changed and programmed** from the Remote and Central Control panel.

Easy Installation and Integration reduce installation time and costs while ensuring systems operate more efficiently.

Transform your
exterior **facades**
into art with
easy and fast
solutions

Three-stage Project Process

1. Renderings of the building are obtained and presented visually.

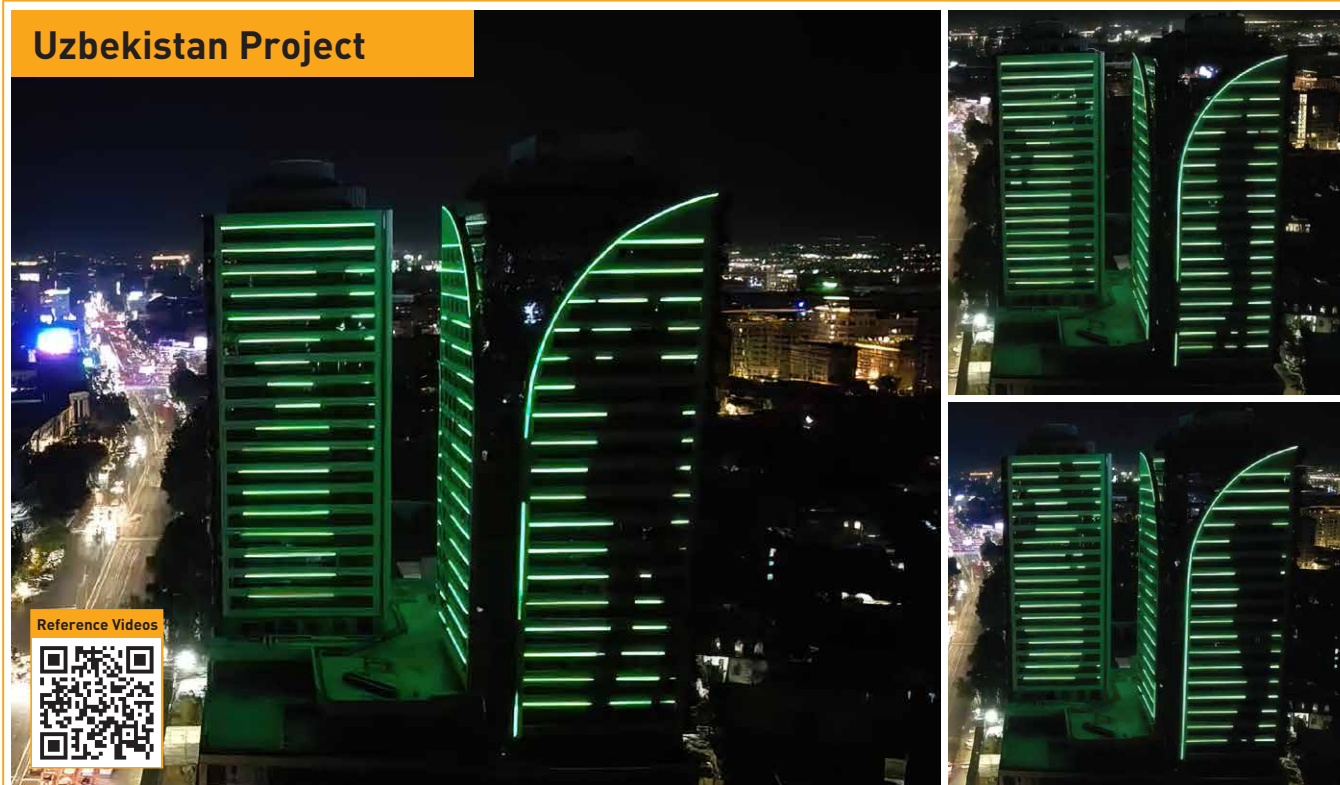

2. A project proposal is prepared.

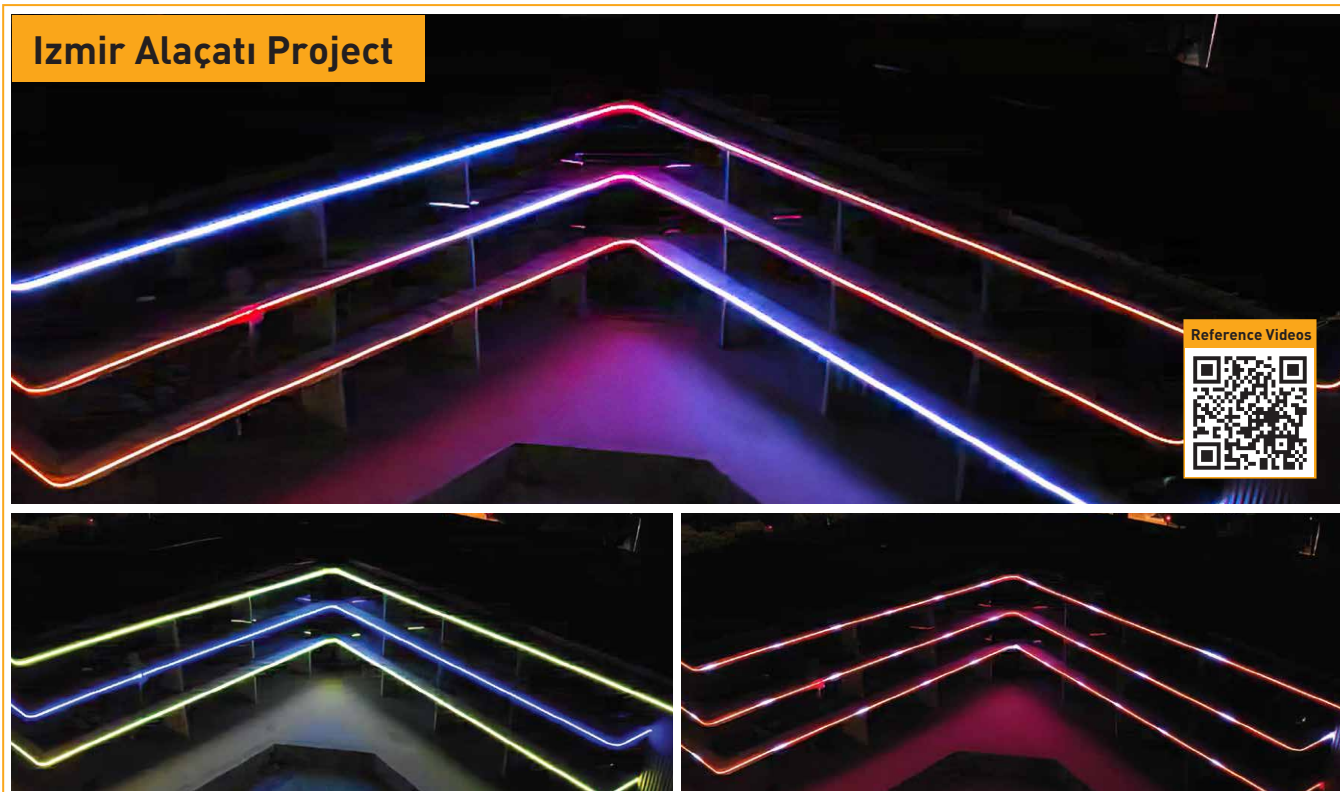

3. After approval of the proposal, installation will be carried out by our professional teams.

Uzbekistan Project

Static and moving light effects were used in the two-stage Uzbekistan - Tashkent Mall project. The mall attracted attention with its DMX operation.

Izmir Alaçatı Project

The residential project gained prestige with repetitive light effects on the exterior.

Gaziantep 6 February Youth Center

The youth center acquired a unique identity with **LED Bar** and **DMX** animations.

Başakşehir SOM Construction Project

A dynamic atmosphere was created in the exterior lighting using our **DMX Linear** products
